DrinkPAK Completes Coast-to-Coast Manufacturing Network with New Philadelphia Facility

New 1.4-million-square-foot facility expands DrinkPAK's national manufacturing footprint and brings high-speed, flexible beverage production closer to customers across the Northeast and Mid-Atlantic.

SANTA CLARITA, Calif. — [DATE] — DrinkPAK, a leading North American manufacturer of canned beverages, announced the upcoming opening of its third manufacturing facility in Philadelphia, Pennsylvania, completing a coast-to-coast production network designed to give beverage brands and retailers greater capacity, flexibility and speed to market.

The new 1.4-million-square-foot facility, known as DP3, is located in the Bellwether District of South Philadelphia and is scheduled to begin production in 2027. Together with DrinkPAK's facilities in Santa Clarita, California, and Fort Worth, Texas, the Philadelphia expansion gives DrinkPAK nearly 5 million square feet of manufacturing capacity strategically positioned across the United States.

"Our coast-to-coast network changes what's possible for our customers," said Nate Patena, CEO of DrinkPAK**.** "With major facilities in California, Texas and now Pennsylvania, we can manufacture closer to where products are sold, provide tremendous capacity and flexibility, and help customers respond to the market faster."

Built for Private Label and Growing Beverage Brands

DP3 is being built to support a wide range of alcoholic and non-alcoholic beverages, including energy drinks, sparkling waters, sodas, teas, juices, functional beverages, protein beverages, seltzers and ready-to-drink alcoholic beverages.

The facility will feature four ultra-high-speed filling lines, each capable of producing up to 3,000 cans per minute, as well as a high-speed automated variety repacking line capable of producing multi-flavor cartons and trays at up to 2,000 cans per minute.

DrinkPAK's extensive can-size and packaging capabilities allow customers to manufacture multiple products and formats through a single production network. Its full-service model supports the beverage manufacturing process from procurement and batching through processing, filling, packaging, warehousing and distribution.

A Coast-to-Coast Manufacturing Network

With DP3, DrinkPAK will operate three of the largest and most technologically advanced canned beverage manufacturing facilities in North America:

DP1 — Santa Clarita, California
Serving the West Coast with convenient access to the Port of Los Angeles and key Western markets.

DP2 — Fort Worth, Texas
Strategically positioned to serve the Central and Southern United States.

DP3 — Philadelphia, Pennsylvania
Providing direct access to the Northeast and Mid-Atlantic, with proximity to I-95 and the Port of Philadelphia.

Together, the network is designed to provide customers with up to 6.5 billion cans of annual production capacity**,** while enabling more efficient regional manufacturing and distribution.

Speed, Scale and Flexibility

Founded in 2020, DrinkPAK was built around a simple idea: beverage manufacturing should move at the speed of modern brands and consumers.

Across its network, DrinkPAK combines ultra-high-speed production, advanced liquid processing, automated warehousing and packaging technology with broad format flexibility. The result is a manufacturing platform designed to support everything from emerging product launches to some of the largest beverage programs in North America.

“Customers shouldn’t have to choose between speed, scale and flexibility,” Patena said. “Our network is designed to deliver all three. Whether a customer is launching a new private-label beverage, expanding into a new region or scaling an established national program, we have the infrastructure to help them move quickly.”

Meet DrinkPAK at PLMA (Booth F7819)

DrinkPAK will showcase its coast-to-coast manufacturing capabilities at PLMA’s 2026 Private Label Trade Show. Retailers and private-label partners can meet with the DrinkPAK team to learn more about turnkey manufacturing, contract manufacturing and private-label beverage programs across its California, Texas and Pennsylvania facilities.

Visit DrinkPAK at Booth F7819 to learn how we can help bring your next beverage program to market.

About DrinkPAK

DrinkPAK is a leading North American manufacturer of canned beverages, providing full-service support across procurement, batching, liquid processing, filling, packaging, warehousing and distribution. With nearly 5 million square feet of manufacturing space across California, Texas and Pennsylvania, DrinkPAK provides the capacity, technology and format flexibility to support leading alcoholic and non-alcoholic beverage brands and private-label programs.
