Hanmandoo Food Unveils New Plant-Based and Premium Seafood Dumpling Lineup for Global Markets

SOUTH KOREA – 2026.06.21 – Hanmandoo Food CO., Ltd., a Korean manufacturer specializing in frozen dumplings for global export, today announced three new additions to its Gourmet product line: Plump Whole Shrimp Dumplings, Plant-Based K-BBQ Dumplings, and Vegan Kimchi.

Plump Whole Shrimp Dumplings

Featuring whole, uncut shrimp wrapped in a tender, chewy skin, this product delivers a premium, restaurant-quality bite that can be steamed, pan-fried, or boiled.

Plant-Based K-BBQ Dumplings

Pairing a smoky, charcoal-grilled-style Korean BBQ marinade with a soy-based meat alternative filling, this dumpling offers a 100% meat-free option with bold, authentic K-BBQ flavor.

Vegan Kimchi

A fully plant-based version of traditional Korean kimchi, made without fish sauce or shrimp paste — ingredients found in nearly all classic recipes — while retaining the same naturally fermented, tangy, spicy flavor.

Hanmandoo Food remains committed to bringing authentic, innovative Korean flavors to consumers and retail partners around the world.
