Parisi Coffee Showcases Craft and Scale Behind Private Label Coffee at the PLMA Show 2026

Parisi Coffee, a Paris Group brand, returns for its fourth year exhibiting at PLMA, November 15–17 in Chicago. At **Booth F2113**, attendees can discover how specialty coffee expertise, thoughtful sourcing and scalable production help retailers build distinctive coffee brands and bring new ideas to market.

“Great store brand programs start with understanding retailer goals and the customers they serve" says **Elizabeth Chimens, Vice President, Contract Manufacturing Sales at Paris Group and PLMA Board Member**. “Our role is to create your products with appropriate specialty coffees delivering the right assortment in store. Our expertise and capabilities make that vision a reality, providing product distinction to grow your coffee category. That’s what we mean by **Elevating Craft. Scaling Possibility.**”

Paris Group brings together sourcing, product development, roasting, packaging and fulfillment to support private and white label coffee programs from concept to finished product—from limited runs to large-scale national retail distribution.

At PLMA, attendees can experience our quality in the cup. Parisi Coffee will be serving **three exceptional competition grade coffees from Colombia** for you to taste. These have been specially curated for the show and will be joining the Parisi Coffee branded lineup. **Honduras Manos de Mujer** will also be featured in PLMA’s World of Ideas New Product Expo. This is one of the many coffees and profiles we have available for private label production to join your top tier store brand. Parisi’s commitment to excellence includes supplying exceptional coffee brought to you directly from our meaningful relationships at origin.

Come talk coffee with **Joe Mario Paris, Robin Seitz, Elizabeth Chimens and David Amos.** Bring your ideas, challenges and coffee goals, and tap into expertise spanning specialty coffee, sourcing, roasting, manufacturing and supply chain. **Let’s build your brand together.**
