Treasure Mills Showcases Private-Label Manufacturing Capabilities at PLMA 2026

Chicago, Illinois | November 15–17, 2026

Treasure Mills, a Canadian food manufacturer specializing in allergen-friendly baked snacks, is attending PLMA's 2026 Private Label Trade Show in Chicago to showcase its manufacturing capabilities and connect with potential retail partners.

With high-capacity, fully automated manufacturing and advanced robotic production lines, Treasure Mills can produce a wide variety of baked snacks efficiently and at scale. Its product range includes mini loaves, Wholesome Oat Bites, Protein Bites, cupcakes, mini muffins, and other individually wrapped baked goods.

Recently, Treasure Mills doubled the size of its manufacturing facility, significantly increasing production capacity and strengthening its ability to support growing retail programs. This expansion positions the company to pursue strategic, long-term partnerships with retailers looking to develop, expand, and scale their private-label product offerings.

At PLMA 2026, Treasure Mills is highlighting its ability to help retailers develop and expand their own private-label snack lines. From flexible product development and packaging options to automated, high-volume production, the company offers manufacturing solutions that allow retail partners to bring products to market under their own brands.

As demand for convenient, better-for-you, great-tasting allergen-friendly snacks continues to grow, Treasure Mills is looking to establish new partnerships, expand its manufacturing programs, and work with retailers to bring new products to market.

Manufacturing Capabilities and Growth Opportunities

- **Advanced Automation:** High-capacity manufacturing supported by fully automated systems and robotic production lines.
- **Efficient Production:** Streamlined, no-touch production processes designed to support consistent quality and high-volume output.
- **Allergen-Friendly Manufacturing:** Experience producing a variety of allergen-friendly baked snacks in an SQF-certified facility
- **Flexible Private-Label Solutions:** Product development and packaging options that allow retailers to create and grow products under their own brands.
- **Partnership and Expansion:** Opportunities to develop new products, build retail partnerships, and scale manufacturing to meet evolving market needs.
